

Download Games For iPhone - Best iPhone Download Sites

Lets first talk real quick about what to look for in bad iphone download sites. The first and most simple issue is having a site that has complex software. You don't want to have to read a manual just to download games to your Iphone. Just check and make sure the site promotes an easy to use program. Generally, the widely used popular sites (that we'll get to in a minute) will have good software. The second biggest thing to avoid in Iphone download sites is "per download fees," or monthly fees. Obviously, this is no good because you are going to be paying way to much, or be unable to download what you want because of the fees. So, make sure not to use sites that have these fees. So, what are the best Iphone download sites? The best site I have found for getting Iphone games and other downloads is through iPhone Nova. They don't have either of the pitfalls I described. They also have 24 hour support, DVD to PC software, a huge selection, and tutorials to get started with.
